What our clients say

We would like to congratulate Rod Stephens on the terrific job that has been done on our new house.

Rod had kept in contact with us from the moment we decided to build, advising and making any alterations that we made to the house plan that we chose.

After finalizing what we wanted in the house, we have had the easiest of runs, with everything falling into place just beautifully.

Rod has made sure that iron for the roof was from the same batch and bricks were from the same batch. We have not had a problem with colour variations.

Rod's team are very competent in their work and have done a terrific job on all aspects of the house.

The site has been kept very clean, so no stumbling over rubbish anywhere.

Rod has gone over and beyond the call of duty, helping us with our water tanks and outside concrete.

We have also noticed that the qualified trades people treat the apprentices with respect, showing them and explaining with patience.

We feel privileged that Rod and his team have given 100% of their workmanship to us and we could not be more pleased with the outcome.

We would encourage anyone thinking of building to give Rod a go. You will not be disappointed.
